

Search and Seizure:

The principals or authorized school officials may conduct a search and seizure. Search and seizure applies to school property, school lockers, private automobiles, digital devices and the student. This also applies to school sponsored activities, whether on our campus or away from our school campus.

Any school property may be entered, examined and searched by school officials; further, student's property such as backpacks, handbags, and automobiles are subjected to this criteria whenever there is reasonable belief that some substance or materials are contained therein which is illegal or harmful to the safety of the student or the student body, or significantly disruptive or dangerous to the overall discipline of the school. This search may include the use of police canine units. Any items which are specifically prohibited by law or by Board policy may be impounded by school officials.
